

## **Scholarships Available for MSc Program at the University of Dundee, Scotland**

Do you or someone you know want to be part of a unique multidisciplinary MSc Course in AAC? The University of Dundee (Scotland) is recruiting for 2014/15. Full Tuition-Fee Scholarships are available. The aims of this interdisciplinary course are to provide individuals with an education, psychology, computing, industry or clinical care background with a better understanding of the latest developments in: The psychology of the development of language and communication; the design and evaluation of AAC solutions on an individual and group basis; and engaging cross-disciplinary teams in the engineering of AAC solutions. The overarching aim of the course is to provide individuals with sufficient research training to allow them to become effective AAC practitioners in a multi-agency context. For more information on the 12-month full-time course (we are also happy to discuss Part-Time options), check the course information page at [http://www.dundee.ac.uk/postgraduate/courses/augmentative alterative communication msc.htm](http://www.dundee.ac.uk/postgraduate/courses/augmentative_alterative_communication_msc.htm).
